## DKB: How can I make a transfer from the Giro to the credit card account?

Christine - 2017-10-26 - in [Banks](#)

According to DKB, no individual transfers can be made directly from the DKB credit account to the DKB credit card account via the "HBCI +" or "FinTS PIN / TAN" interface used by us.

For this purpose, DKB offers a collective account to which the customer can transfer the desired amount. This amount is then credited to the credit card account.

The following account connection can be used for deposits:

Receiver: Deutsche Bank Kreditbank AG

Account: 1999333

Bank Account: 120 300 00

IBAN: DE63 1203 0000 0001 9993 33

BIC: BYLADEM 1001

Usage: 16-digit VISA card number and first and last name of the credit card holder
