PayPal: How can I request PayPal API authorization?

Krisztina - 2019-12-27 - in Banks

For using PayPal with Outbank, please request an API authorization from PayPal:

A) Old PayPal layout:

1. Login on the PayPal website.
2. Open "My Profile".
3. Choose Seller/Dealer left in the menu and select "Update" in the row "API access".
4. Choose "Option 2" by selecting "View API Signature".
5. To request PayPal's API username, -password and -signature (needed to use Paypal in Outbank) please choose "View API-Signature" and select "approve and send".
6. With this step you requested the Paypal API authorization.
7. The created API credentials get fetched autmatically with the creation/synchronisation of the account in Outbank.

B) New PayPal layout:

1. Login on the PayPal website.
2. Select "Seller Preferences" in the overview page.
3. You are at "My Profile". Select "Update" in the row "API access".
4. Choose "Option 2" by selecting "View API Signature".
5. To request PayPal's API username, -password and -signature (needed to use PayPal in Outbank) please choose "View API signature" and select "approve and send".
6. With this step, you requested the PayPal API authorization.
7. The created API credentials get fetched autmatically withe the creation/synchronisation of the account in Outbank.
