Are transfers considered in the new reports?

Christine - 2019-02-13 - in Reports

In the Dashborad's Categories 'Outgoing' and 'Incoming' and 'Tags' transfers are no longer included. If the app recognizes transactions correctly as transfers they will be taken into account.

If you see transfers, that are not recognized correctly you can change the category or the tag manually:

- on iOS: select the transaction either from the reports or in the list of transactions > with a swipe to the right you can change the category or the tag
- on macOS: please select the transaction from the list of transaction - at the moment you cannot change the category from the reports directly > open the transaction details and change the category or the tag
- on Android: select the transaction either from the reports or in the list of transactions > with a swipe to the right you can change the category or the tag
