How can I do payments?

Christine - 2019-04-03 - in Send money / Request money

Here is how you can do payments:

- iOS: 'click on the +-Button the Tabbar' > 'Payment'. The button will only show up if you have set up accounts that support SEPA payments with "HBCI+" or "FinTS PIN/TAN".
- macOS: press the 'Send Money' Button up in the right corner
- Choose the account that you want to send money from. Please note that the account list only shows accounts that support SEPA payments.
- Enter the receiver name and the IBAN or choose a contact from existing transactions. Please note that some banks additionally require the BIC, Outbank has no influence on that.
- Next
- Enter the amount and the transfer reason. If your account supports scheduled payments, you can select the execution date below the transfer reason.
- Next
- Now you can review the transaction data and choose your preferred TAN method:
 - classic TAN
 - indexed TAN (iTAN)
 - mobile TAN (mTAN)
 - manual chipTAN
 - optic chipTAN
 - photoTAN
 - pushTAN
 - BestSign
- Enter the TAN to send the payment.

NOTE: Currently, Outbank does not support direct debit.
