## How can I change the account order within a group?

Christine - 2018-01-29 - in Account Grouping

You can change the account order within a group directly in the account list:

'Accounts' > 'tap and hold the account' > 'grab account at the grey bars on the right side' > rearrange it as you wish.

This way, you can also move the account to another group. Please make sure the other group is open when you move the account.
