How can I customize the transaction appearance in Outbank?

Christine - 2019-08-09 - in Edit accounts

On your iOS devices, you can customize the appearance of your transactions so that you only see those information in the transaction list that are important to you.

To customize your Outbank: At 'Settings' > 'General' > 'Appearance' select which information of a transaction should be displayed in the transaction list: category, subcategory, tags, transfer reason, IBAN / account number.
