How can I exclude individual accounts from the grand total?

Christine - 2018-03-28 - in Edit accounts

From version 1.9.0 onwards you get a unified transaction view with transactions from all your accounts ('All transactions').

In addition, you can see the total sum of all accounts in the account list. In order to exclude one or multiple accounts from that total sum, please follow these steps:

- Click on 'All transactions' to open the unified transaction view

- Tap on the three dots and then on filter above the transaction list

- Click on accounts or account groups to select the accounts/groups you want to include in the total sum
