How can i do a transfer via QR Code?

Christine - 2018-01-11 - in Send money

To do a transfer via QR-Code on your Android device please proceed as follows:

- Click on the '+' button at the end of your account list and then on 'Send money'
- choose the account from which you want to do the transfer
- click on 'Scan QR-Code' on scan the QR-Code from the bill with the camera. The data will be filled in automatically
- confirm the payment as usually with a TAN
