## How can i exclude accounts or account groups from the account refresh?

Christine - 2018-03-28 - in Edit accounts

From version 1.9.0 onwards you get a unified transaction view with transactions from all your accounts ('All transactions').

To exclude accounts from the refresh, please follow these steps:

- Click on 'All transactions' to open the unified transaction view
- Tap on the three dots in the upper right corner > Filter
- Click on accounts or account groups to select the accounts/groups you want to include in the total sum
- If you refresh your accounts now (pull down in the list of transactions in 'All Transactions'), only the selected accounts will be refreshed
