How can i request money in Outbank?

Christine - 2018-01-29 - in Send money / Request money

This is how you can request money with your iOS device using a QR-Code:

- 'click on the +-Button in the tabbar' > 'Money Request'
- Fill in the requested amount, a note if you want to and select the account the money should be transfered to
- Send your request via the share-button e.g. via E-Mail
- the QR-Code will then be sent via E-Mail

Outbank uses the standardized SEPA-QR-Code (EPC069-12)
