How can I exclude accounts from general refresh?

Christine - 2019-08-09 - in Edit accounts

You can exclude accounts from general refresh and the automatic refresh when starting the Outbank app.

To exclude an account from general refresh:

- **iOS:** Choose the account in the account list > tap on the account name above the transaction list > 'Settings' > activate the switch 'Ignore upon refresh'.
- **macOS:** Select the account in the account list > click on the account name above the transaction list > 'Settings' > set the check mark at 'Ignore upon refresh'.
