How can I change my master password in Outbank?

Christine - 2018-01-29 - in Master password

You can change your master password at any time as follows:

'Settings' > 'Master Passwort' > 'Enter the current master password' > 'Next' > 'Enter a new master password'

Please note: The master password must have at least 6 digits and should only be known to you. To increase the password quality, use uppercase and lowercase letters as well as numbers & symbols.
