How can I edit my offline accounts in Outbank?

Christine - 2018-11-15 - in Offline accounts

You have 2 options to edit your offline accounts in Outbank:

1. Open the offline account > click on the three dots in the upper right corner > Settings. Now you can change the name, hide the account, change the currency & delete an account.
2. Click on 'Settings' > 'Bank credentials' > 'Offline accounts'. Here you can find a list of all your offline accounts. Click on the account that you want to change and now proceed with the editing process as described in step one. In this view you also have the option to delete all offline accounts at once.
