How can I transfer my data from Android to my iPhone/iPad?

Christine - 2018-07-13 - in Backups

Please follow these steps to transfer your data via local backups from Android to your iPhone/iPad:

- Send the backup from your Android device to your iPhone, f.e. via Email: Settings > Backups > select backup of your choice > share
- Share backup via email
- Install Outbank on your iPhone/iPad
- Open the email on your iPhone/iPad, click on the backup in the attachment and choose Outbank to open it
- Enter the Master Password which was used to create the backup on your Android device.

Important: Log in again with your Outbank ID after restoring a backup.
