## How can I transfer me data from my Mac to Android?

Christine - 2018-04-05 - in Backups

Please follow these steps to transfer your data via local backups from your Mac to an Android device:

- File > Backups > click on backup of your choice > Share
- Send backup to your own email address
- Install Outbank on your Android device
- Open the email on your Android device, click on the backup in the attachment and open it with Outbank
- Enter the Master Password which was used to create the backup on your Mac

**Important:** Log in again with your Outbank ID after restoring a backup.
