## How can i share my account details with others?

Christine - 2018-07-13 - in Edit accounts

You can share your account details on three different ways:

1. copy/paste:  
open the account details on press e.g. the IBAN row for a while. Then choose 'Copy' and place the data where needed.
2. Share your account details via the settings:  
'Settings' > 'select credential' > 'select the account' > 'click on the share button' > send your account details, e.g. via E-Mail
3. Share your account details directly via the list of transactions:  
'Accounts' > 'select account' > 'click on the three dots besides the account name' > 'Settings' > 'click on the share button' > send your account details, e.g. via E-Mail
