How can I search my sales for a specific amount?

Christine - 2019-01-21 - in Search & Filter

To search your sales for a specific amount, simply use our search function. Please enter the search amount exactly (also possible with + or minus forward), if you want to search inaccurate amounts.

Examples: If you search for a booking of 100 € you can search for 100 (without commas). All bookings for exactly 100,00 € are displayed.

If you are looking for a booking for more than € 100.59, you have to enter this amount exactly.

"001" -> search for amount and regular search (e.g. transfer reason)

" +001" -> filter transactions with value 1.00

"1." -> filter transactions with value -1.00 or +1.00

"=1" -> filter all transactions with value 1.00

"=-1" -> filter all transactions with value -1.00

"0.01" -> filter transactions with value -0.01 or +0.01

" +0.01" -> filter transactions with value +0.01

"-0.01" -> filter transactions with value -0.01

">0.01" -> filter all transactions with value > 0.01

">-0.01" -> filter all transactions with value > -0.01

">1" -> filter all transactions with value > 1.00

This can also be combined:

">=1 <100" -> filter all transactions in interval [1, 100)

" +1.00 +10.00" -> will filter all transactions, since no transaction can have value of 1 and 10 at the same time.

iOS:

- You can start the amount search via the Inbox (Unread Revenues) to search for sales

in all accounts.

- To search for a specific account, select the account in the account list and drag down the sales list slightly, until you can enter the amount into the search line.

MacOS:

- Enter the amount you are looking for in the search line above the account list. You can then use the filter function to select whether to search for all accounts or only in selected accounts.

Android:

- Enter the amount you are looking for using the magnifying glass above the account list. You can then use the filter function to select whether to search in all accounts or only in a selected account.
