## How can i see only my new / unread transactions?

Christine - 2017-10-26 - in Search & Filter

From version 1.10 onwards you get a unified transaction view with transactions from all your accounts ('All transactions').

Here you see all transactions from all accounts.

To see only your new / unread transactions, you can activate the 'Unread Transactions' mode with only one click:

- iOS:  
open the timeline with 'All Transactions' > click on the button with the three horizontal lines at the end of the transaction list
- macOS:  
open the timeline with 'All Transactions' > click on the button with the three horizontal lines in right upper corner above the transaction list
