How can I print/export search results & unfiltered transactions on my Mac?

Christine - 2017-10-24 - in [Automatische Kategorien & Manuelle Tags](#)

Since version 1.10, you can print and export unfiltered transactions & search results.

Simply enter a search term and add a filter, if necessary. Example: Search for 'rent' and filter for '2017'.

Now select all transactions by holding CMD pressed. If you want to export/print all transactions enter CMD+A.

Click on the 'Print' button at the bottom of the app and choose whether you want to print or export as PDF/CSV.
