How can i use Widgets in Outbank?

Krisztina - 2019-04-01 - in Widgets

Since version 2.18.0 you can use widgets in Outbank for balances and budgets.

To use widgets in Outbank please go first to Today View of your iOS device and add the Outbank widgets. You will see the empty widgets which you can adjust in Outbank's settings.

This is how you can adapt the widgets:

- For Balances: 'Setting' > 'Widgets' > 'Balances' > add the accounts you want to see in the widget. To change the order of the widgets just use drag and drop
- For Budgets: 'Setting' > 'Widgets' > 'Budgets' > add the budgets you want to see in the widget. To change the order of the widgets just use drag and drop

Please note:

- **Widgets are not synched via Secure Sync.** So you have to setup the widgets on every device separately.
- **No widgets in lock screen:** If your device is locked the widgets will not be shown.
