Why is there no list of all tags?

Christine - 2018-06-19 - in [Automatic categories & manual tags](#)

Your tags are not shown in a list in Outbank, they are displayed automatically if you enter the hash (#) in the search field. A drop-down list with all the last used tags will appear. If you enter an initial letter in addition, all tags appear with the respective letter.

So you do not have to go into a separate list anymore, but you can have all tags displayed directly in the search field.
